Sales & Revenue Performance

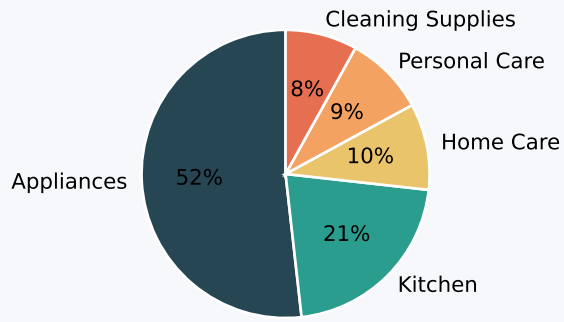

Executive Overview | Synthetic portfolio dataset — 2025

29,224	₹25.8M	₹6.6M	₹883	25.4%
Orders	Net Revenue	Profit	Average Order Value	Profit Margin

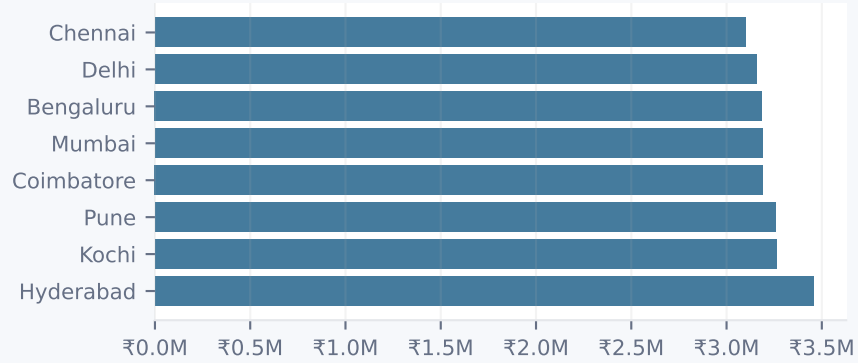

Monthly Revenue & Profit

Revenue Mix by Category

Revenue by City

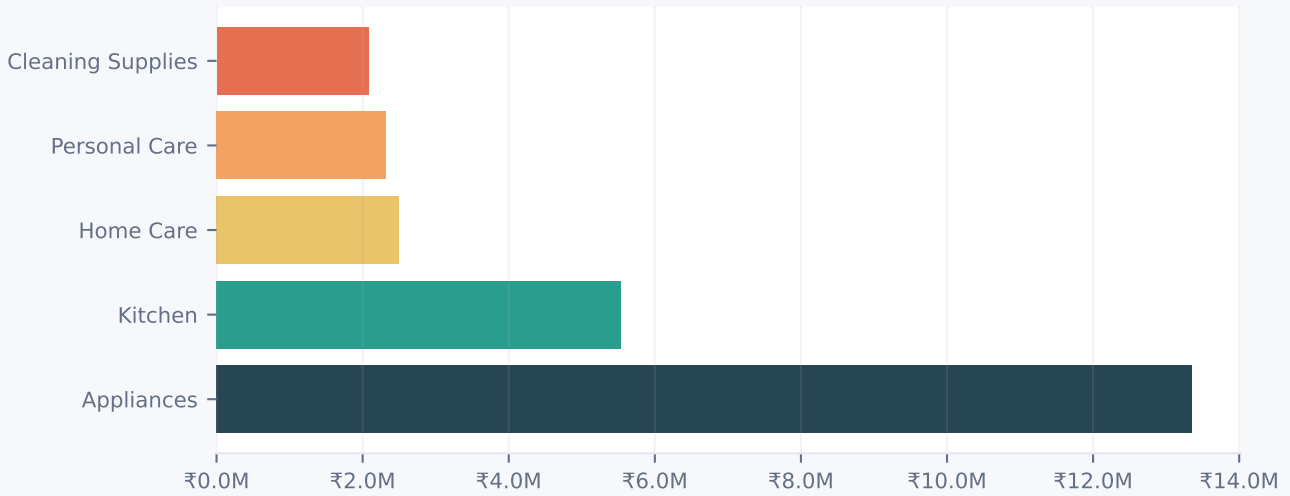

Management readout: protect high-margin categories, scale strong city/channel combinations, and review discount-heavy orders.

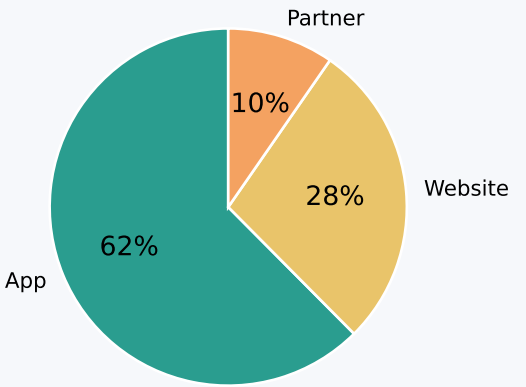

Sales Drivers & Market Performance

Where revenue comes from — and where margin needs attention

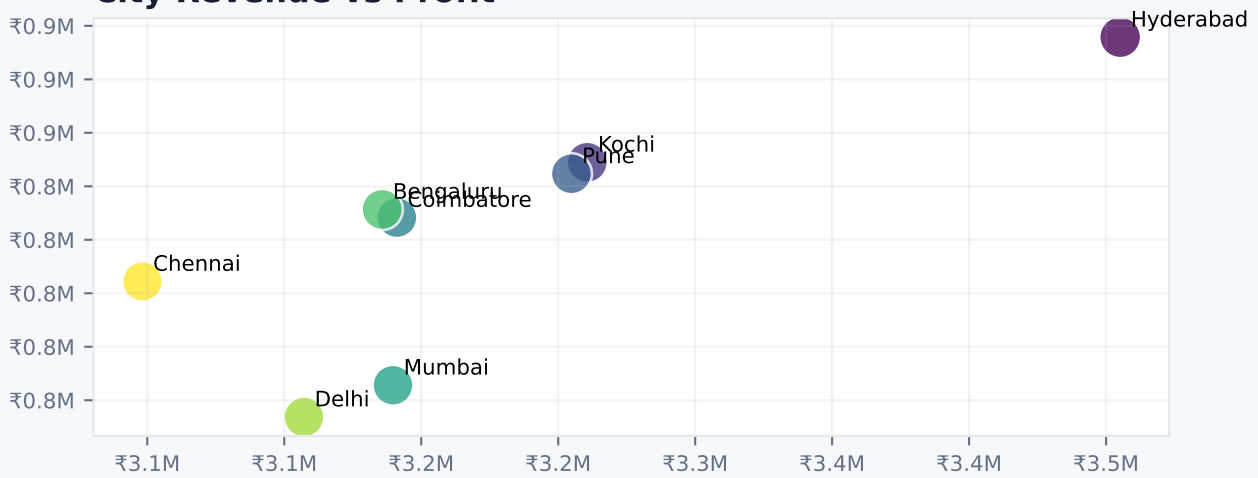

Category Revenue Ranking

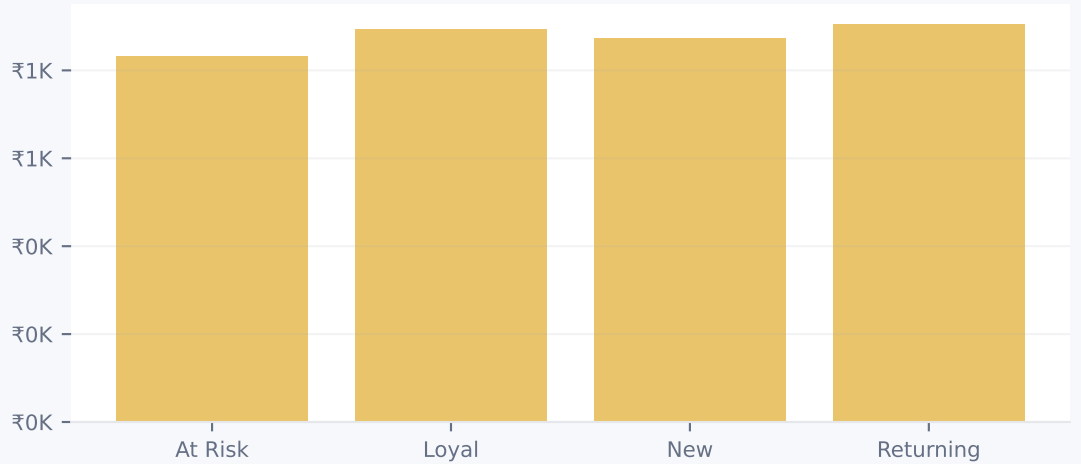

Revenue Mix by Channel

City Revenue vs Profit

Average Order Value by Segment

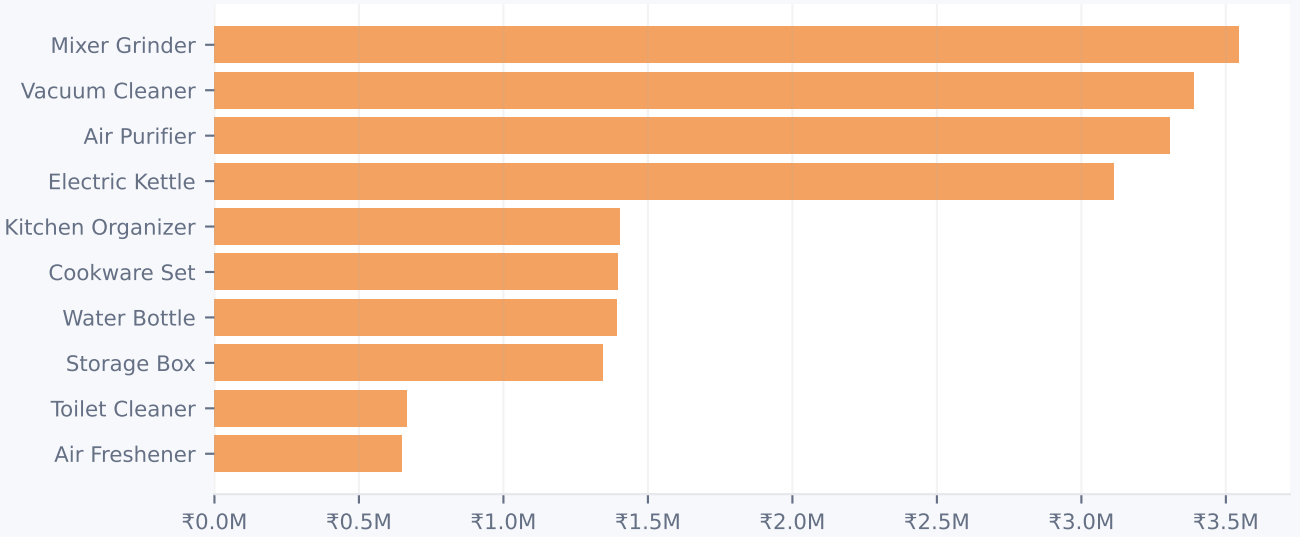

Insight: high revenue is not automatically high value; compare revenue with profit and cost drivers.

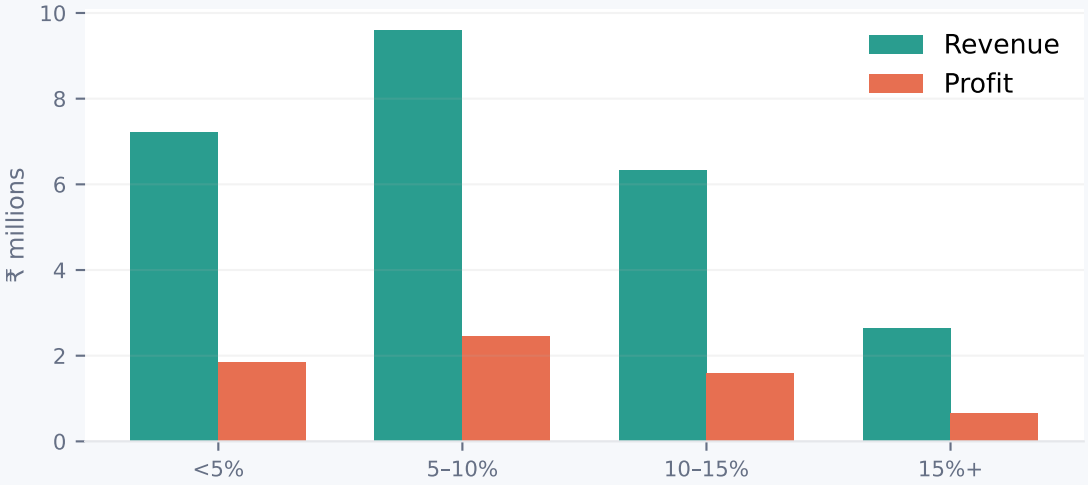

Product, Pricing & Profitability

Identify products and discount levels that create profitable growth

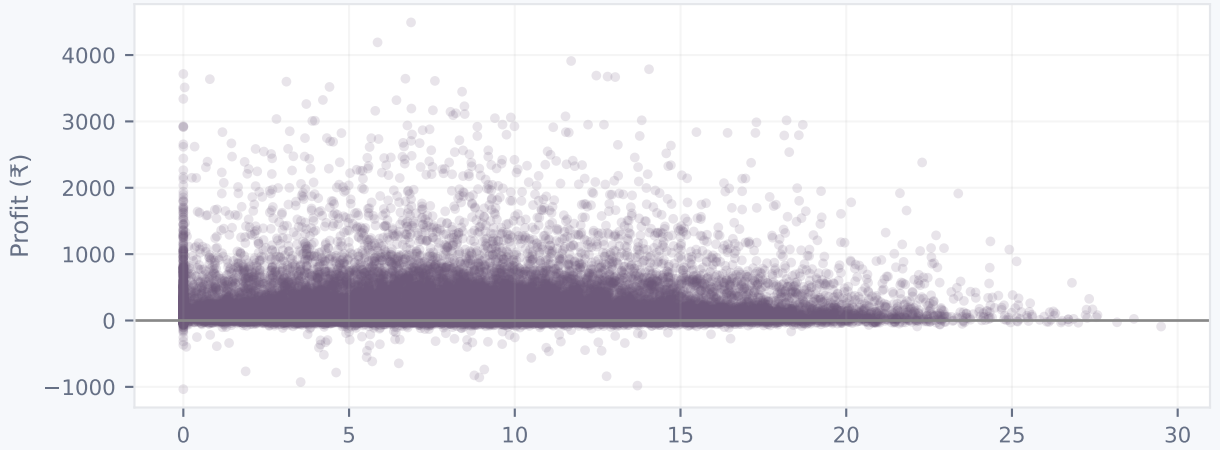

Top 10 Products by Revenue

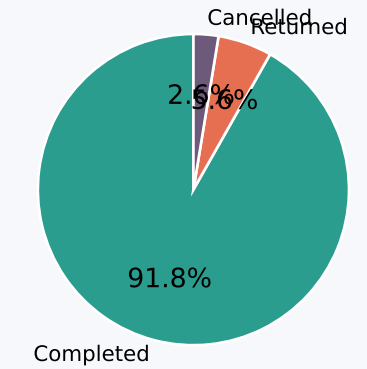

Discount Band vs Financial Outcome

Discount % vs Order Profit

Order Status Mix

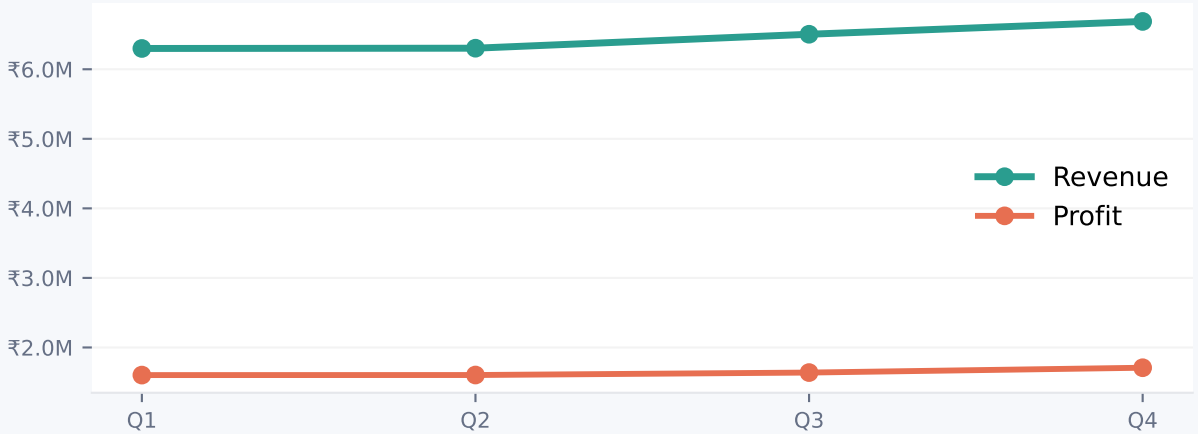

Pricing rule: increase discounts only where incremental volume offsets the margin lost per order.

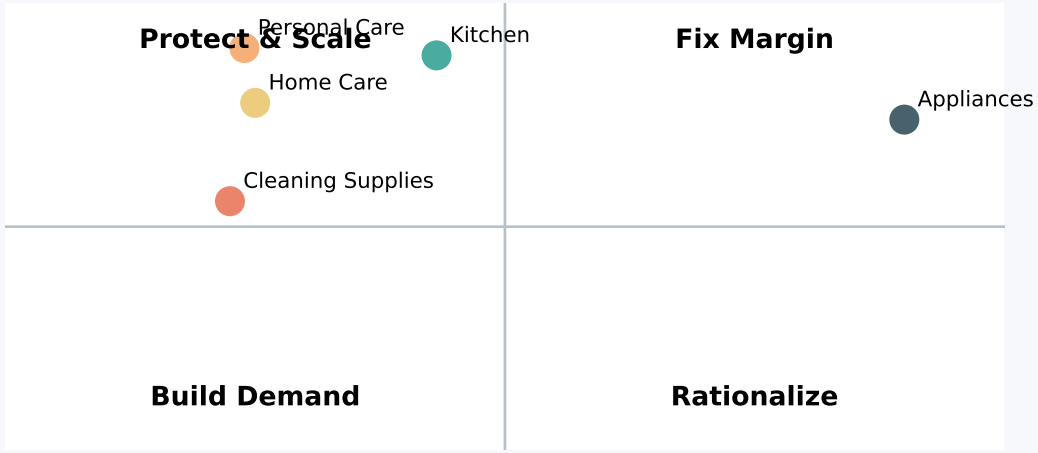

Business Action Plan

From descriptive analytics to decisions

Quarterly Financial Trend

Category Opportunity Matrix

1 Scale profitable categories

Prioritize high-revenue/high-margin categories.

2 Tighten discount governance

Set discount guardrails where profit deteriorates.

3 Improve city economics

Investigate shipping, returns and acquisition costs.

4 Optimize channels

Shift spend toward stronger profit per order.

5 Track weekly

Monitor revenue, AOV, margin, returns and cancellations.
